PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience building and shipping production-grade web applications and Generative AI systems. Specialized in React, Electron, Python backend development, and LLM integration (OpenAI GPT-4, Claude, LLaMA-3/4, Gemma). Delivered real-world enterprise products — including a natural language ERP desktop app, multilingual OCR pipelines, and AI-powered document automation — used actively by operations teams. Strong AWS cloud and end-to-end product delivery background.

TECHNICAL SKILLS

Frontend	React, Electron (Desktop Apps), HTML5, CSS3, Bootstrap, JavaScript, Java
Backend & APIs	Python (OOP, scripting, automation), Flask, Streamlit, REST API, CustomTkinter, Node.js
Generative AI & LLMs	OpenAI GPT-3.5/GPT-4, Claude (Anthropic), Groq LLaMA-3/4, Google Gemma 4 31B, Gemini Vision
AI Frameworks	LangChain, LangGraph, LangSmith, FAISS, Hugging Face NLP, Dialogflow, MCP (Model Context Protocol)
RAG & Architecture	RAG pipelines, Vector Search, Amazon Bedrock Knowledge Base, DuckDB in-memory caching
Document & OCR	PyMuPDF, python-docx, Smart OCR (Sarvam AI, Gemini Vision, Claude Vision), Multilingual NLP
Cloud & DevOps	AWS EC2, S3, RDS, Lambda, CloudWatch, SNS, ALB, Auto Scaling, EBS, EFS, Route 53
Databases & Tools	MySQL, Git, DuckDB, FAISS Vector Store

PROFESSIONAL EXPERIENCE

Software Engineer — AI & Python Development | Pustaka Media Pvt Ltd, Bangalore | 2024 – Present

Full Stack & Frontend Development

- ▶ Built and maintained scalable full-stack web applications and internal dashboards for a storytelling platform serving thousands of active users — React frontend + Python/Flask backend.
- ▶ Developed channel-wise S3 EPUB download automation using Python, streamlining bulk content delivery pipelines end-to-end.
- ▶ Resolved 150+ bugs and feature requests across product, QA, and design teams — spanning frontend UI fixes to backend logic and database queries.
- ▶ Automated story-processing workflows using Python and SQL scheduled jobs, reducing manual effort by ~60%.

Generative AI & LLM Development

- ▶ Designed and deployed a production-grade AI chatbot using MCP (Model Context Protocol), LangChain, and Claude/OpenAI GPT-4 for intelligent query handling across enterprise teams.
- ▶ Built a multi-format RAG pipeline using Amazon Bedrock Knowledge Base and FAISS, boosting semantic retrieval accuracy across thousands of documents.
- ▶ Orchestrated multi-step LLM workflows using LangGraph and LangSmith for tracing, debugging, and production monitoring of AI pipelines.
- ▶ Integrated Groq-hosted LLaMA-3 models for high-speed inference in chatbot and automation tasks, reducing latency significantly.

AWS Cloud & DevOps

- ▶ Integrated AWS services (EC2, S3, RDS, Lambda, CloudWatch) to improve application scalability and reliability.
- ▶ Configured ALB, Auto Scaling Groups, CloudWatch alarms, and SNS notifications for high-availability production environments.
- ▶ Developed Python-based AWS Lambda serverless functions to automate backend processing tasks.

KEY PROJECTS

ArthaAI — Natural Language ERP Interface | 2024–2025

Electron · Node.js · Google Gemma 4 31B · MCP · Tally Prime ERP

- ▶ Built a production desktop application with a natural language chat interface to Tally Prime ERP — enabling non-accountants to query live financial data without any technical knowledge.
- ▶ Developed 32 custom MCP tools covering invoice creation, P&L reports, balance sheet generation, and bulk data import — all via plain English commands.
- ▶ Integrated Google Gemma 4 31B with DuckDB in-memory caching for fast analytical SQL queries and multi-format export (Excel, Word, PDF).

AI Smart OCR — Multilingual Document Digitizer | 2024–2025

Python · CustomTkinter · Gemini Vision · Claude Vision · Sarvam AI · PyMuPDF

- ▶ Built a Windows desktop app converting scanned book images, PDFs, and ZIP archives into formatted Word documents using 4 OCR engines in parallel.
- ▶ Integrated Sarvam AI with support for 22 Indian languages; implemented smart Tamil custom-font PDF detection with automatic font routing.
- ▶ Packaged as a standalone EXE with obfuscated API keys for secure distribution across non-technical teams.

BookCraft Pro — Bilingual AI Book Description Generator | 2024–2025

Python · CustomTkinter · Groq LLaMA-4 · Claude API

- ▶ Built a bilingual (Tamil/English) AI tool generating back-cover book descriptions from EPUB/DOCX/TXT files — actively used by the publishing operations team.
- ▶ Implemented dual AI provider with automatic fallback (Groq LLaMA-4 + Claude), batch processing with real-time status, and 3-format export (TXT, DOCX, CSV).
- ▶ Rated 9/10 on AI integration quality by internal reviewers.

Pustaka Agreement Generator — AI Document Automation | 2024

Python · Streamlit · Claude API · python-docx

- ▶ Auto-generates publishing agreements across 7 agreement types by extracting author details from uploaded files (PDF/DOCX/TXT) using Claude API and populating Word templates — eliminating manual form-filling.

EDUCATION

Master of Computer Application | CGPA: 8.2

St. Joseph's College (Autonomous), Trichy, Tamil Nadu | 2021 – 2023

Bachelor of Computer Application | CGPA: 8.9

Parvathy's Arts and Science College, Dindigul, Tamil Nadu | 2018 – 2021

CERTIFICATIONS & ACHIEVEMENTS

- ▶ **Building with the Claude API — Anthropic (Official Certification) ★**
- ▶ Complete Python Pro Bootcamp 2022 — Udemy
- ▶ Problem Solving Certification — HackerRank
- ▶ Google UI/UX Design 2023 — Coursera
- ▶ Conducted a 3-day seminar on AI & Machine Learning at Peri Institute of Technology
- ▶ Presented research paper at ICRTCCB 2023, Sethu Institute of Technology
